RESURGENT INDIA

Leapfrogging Development through Innovation & Entrepreneurship

Partners

Leapfrogging Development through Innovation & Entrepreneurship

The 12th edition of CSR Leadership Summit is themed around building a Resurgent India by providing a platform for ecosystem level conversations that focus on social, economic and environmental impact through innovation and entrepreneurship.

Post Covid, Entrepreneurship is recognised as an important tool for Resurgent India. The Government of India has set up Startup India as a flagship initiative, intended to build a strong and inclusive ecosystem for innovation and entrepreneurship in India. Thirty states in India already have start-up promotion policies.

India has a healthy ecosystem of social entrepreneurs creating impact in complex and challenging sectors like health, agriculture, education, energy and climate change. But if India needs to improve the standard of living of a billion plus Indians and change the discourse from Poverty to Prosperity, it needs to scale up innovation in development sector to the next level.

The issues which will be brought to the discussion table include availability of financial support for innovation for solving complex social, economic and environmental problems which often require translating deep science and technology innovations into scalable solutions.
